

Fisher Barton Announces Organizational Change

WATERTOWN, WIS (September 14, 2016) – Fisher Barton today announced the appointment of Igor Zelenovskiy to the role of Group President as of September 6, 2016. As Group President, Zelenovskiy will have responsibility for all of the company’s operating units worldwide. He will build on the solid foundation and momentum achieved by the Fisher Barton team under former Group President Greg Wilkey’s leadership and will be responsible for driving Fisher Barton’s future growth initiatives.

Zelenovskiy joined Fisher Barton in 2014 as President of the Fisher Barton Technology Center. During his tenure with the company, he successfully helped establish the state-of-the-art Technology Center – a long-term vision for the Fisher Barton Group. Under his leadership, the company engaged in the development of new products and processes to accelerate Fisher Barton’s growth.

An accomplished leader, Zelenovskiy has a track record of working with high-growth companies. Prior to joining Fisher Barton, he served in various leadership positions with Rexnord Corporation, Joy Global and Rockwell Automation. In addition to his technical experience, Zelenovskiy has extensive experience in product marketing and sales.

Zelenovskiy earned a Master of Science degree in Manufacturing Engineering Management from the University of Wisconsin Milwaukee and a Bachelor of Science degree in Electro Mechanical Engineering from Donetsk State Polytechnic University, Ukraine.

About the Fisher Barton Group

The Fisher Barton Group of independent companies – Fisher Barton Blades, Fisher Barton Specialty Products, TST (Thermal Spray Technologies), Fisher Barton South Carolina, Zenith Cutter, Lineage Alloys, Metkraft, Accurate Specialties and Fisher Barton Technology Center – leverage their materials expertise and world leading process innovations to manufacture high value components for a variety of markets including agricultural equipment, converting equipment, outdoor power equipment, medical device, recycling equipment and solar power.
